

MEMBER PROFILE

NAME: Christine Dryden
COMPANY: Currie & Brown
JOB TITLE: UK Operations Director

WHAT IS YOUR BACKGROUND?

I'm a chartered quantity surveyor with a background in creating innovative commercial arrangements for clients, centred on performance management techniques.

WHAT DOES YOUR COMPANY DO?

Currie & Brown advises clients in respect of their physical assets to add value at every stage of the project lifecycle. Our core services are cost management, project management, building surveying and project controls.

HOW DID IT ALL START?

Currie & Brown opened its office in Milton Keynes in 2003 when the company's head office moved from Harpenden to London. The town was regarded as an ideal location because of its transport links and good pool of talented potential staff.

WHAT IS THE BIGGEST RISK YOU'VE EVER TAKEN - AND DID IT WORK OUT?

I managed a value management exercise on a high-profile retail roll-

out programme, risking client profit and damage to my good client relationship if the solutions were not successful. The risk paid off and the proposal was accepted.

WHAT EXCITING PROJECTS IS YOUR BUSINESS WORKING ON?

Currie & Brown is positioning itself to play a significant role in the delivery of Plan:MK, using our on-board team of local professionals.

WHAT MADE YOU JOIN MILTON KEYNES CHAMBER?

It offered good local training and networking events. I've taken part in several breakfast seminars and training courses and the Chamber's connections with local professionals assisted me in managing a TUPE process for my team.

Where EMF Safety Matters, Use The Latest Technology

EMF Safety Meters, Sensor Heads & Software
 Necessary For Compliance To New EU Workplace Directive 2013/35/EU
 (becomes law July 2016)

Dedicated RF safety meters and sensor heads are becoming vital for measuring these fields, but the measurements you obtain are only as good as the instruments you use. AR's family of safety products includes important features and benefits, and provides essential items in their standard configuration that others don't. AR sets a new standard with the following features and benefits:

- Perform measurements using one meter
- Frequency coverage from DC to 40 GHz
- Internal GPS module
- User friendly remote control interface
